    Submitted Files
11
12
    README - This file.

Makefile - An empty file. no need to compile in Python
    README
14
    VMtranslator- A shell script that runs the python script with the given the
15
                   asm file name (or folder) as an argument
16
                       - The main program
    VMtranslator.py
17
18
    CodeWriter.py- Translate the Commands from VM to assembly
    Command.py - A class representing a command line
Parser.py - Parses the given file to commands list
19
    Parser.py
20
21
    Run command
22
23
    ./VMtranslator <file_name>
25
26
27
    Remarks
28
    * Our implementation followed the design given in the lectures
    * "It's a trap"
```

3 CodeWriter.py
